DETAILED ACTION

Response to Amendment

1. This Office action is in response to the Request for Continued Examination filed 18 April 2007. Claims 31-50 are pending. Claims 1-30 have been cancelled. All objections and rejections not repeated below are withdrawn.

Specification

2. The disclosure is objected to because of the following informalities:

On page 6, last paragraph of the Specification mailed on 18 April 2007, "Page X, line X" should be corrected with the appropriate page and line numbers.

Appropriate correction is required.

Claim Objections

3. Claims 32 and 33 are objected to because of the following informalities:

Claim 32 should be dependent on claim 31 instead of the cancelled claim 21.

All dependent claims are objected to as having the same deficiencies as the claims they depend from. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Art Unit: 2189

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 46-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 46 recites the limitation "tangible computer readable medium". The term "tangible" is not defined by the Applicant's disclosure and renders the claims' metes and bounds unclear, since it is unclear to the Examiner what exactly constitutes a "tangible" medium. It would be more appropriate to remove "tangible" from the claim limitations.

All dependent claims are rejected as having the same deficiencies as the claims they depend from. Appropriate correction is required.

Double Patenting

6. Claims 28 and 30-48 of U.S. Patent Application 10/809,579 contain every element of claims 31-50 of the instant application and as such provisionally anticipate claims 31-50 of the instant application.

"A later patent claim is not patentably distinct from an earlier patent claim if the later claim is obvious over, or **anticipated by**, the earlier claim. In re Longi, 759 F.2d at 896, 225 USPQ at 651 (affirming a holding of obviousness-type double patenting because the claims at issue were obvious over claims in four prior art patents); In re Berg, 140 F.3d at 1437, 46 USPQ2d at 1233 (Fed. Cir. 1998) (affirming a holding of obviousness-type double patenting where a patent application claim to a genus is

Art Unit: 2189

anticipated by a patent claim to a species within that genus). " ELI LILLY AND COMPANY v BARR LABORATORIES, INC., United States Court of Appeals for the Federal Circuit, ON PETITION FOR REHEARING EN BANC (DECIDED: May 30, 2001).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

7. Applicant's arguments with respect to claims 31-50 have been considered but are moot in view of the new ground(s) of rejection.
